

Now.....Making DOT Brake Hoses is even more affordable

Introducing.....The BrakeQuip Economy Systems Program

Makes Both
OEM Rubber
AND
Stainless Steel
Braided Hoses

Imagine saying "Yes" to every brake hose inquiry.....All backed up with product, marketing and technical support.

Nothing beats convenience. The BrakeQuip DIY system brings brake hose manufacturing to the point of sale.....revolutionizing brake hose supply. Whatever vehicle requires a hose, from the family sedan to industrial forklifts, you can provide the hoseFAST!

It won't be long until new customers find their way into your business. Your reputation for 'One Stop' service made possible by in-house manufacturing of regular and custom brake hoses will keep customers returning who value convenience and dependability.

Features:

- Able to make any brake or clutch hose to suit any type of vehicle
- Raw materials used are OE quality
- All hoses comply with DOT Standard FMVSS106
- All systems have "positive stop" dies to eliminate operator error
- All hoses are pressure tested to 3000psi....in 30 seconds
- Easy to operate.....very little training required
- This unique system attracts new customers into your business

Commonly Asked Questions

In a nutshell, how does it work?

You purchase a hose crimping facility and a hose tester plus have access to a large supply of hose and fittings. We also support you with technical support, marketing and training aides.

Do I need experience making hoses?

No! Even if you have three thumbs, the BrakeQuip system is simple to operate. You'll also receive an accessory kit with tools you need to do a professional job, plus an easy-to-refer-to operations manual and specialized catalogs.

Which hoses can I make?

ANY and ALL types of hydraulic brake or clutch hoses to fit ANY and ALL vehicles, even go-carts, motorbikes, forklifts, and industrial machinery.

Do I need to stock all fittings in the market?

No. BrakeQuip can provide fittings for you that cover at least 80% of your market. For fittings not in stock, you can easily reuse customers' old fittings.

What types of businesses are suitable for the BrakeQuip system?

Brake Repair Specialist. Auto Parts Store. Undercar Specialist. Large General Repair Shop. Hydraulic Hose Shop.

What size market can support this type of business?

This depends on you and how aggressive you market your new program in your market area.

A market area of 5,000 in your trading area can justify your investment. More than that could be an unusually good opportunity.

Join the hundreds of satisfied BrakeQuip Distributors before your competitor does.
