INNOVATIVE SOLUTIONS FOR AUTOMOTIVE PLUMBING

INNOVATIVE SOLUTIONS FOR AUTOMOTIVE PLUMBING

## The Handiest Tool in a Brake Mechanic's Toolbox

BQ402

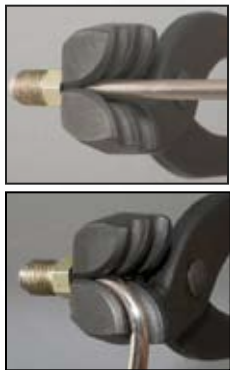

Cushioned Handle

For use on 3/16" and 1/4" brake tube.

- Convenient
- Quality crafted

Brake mechanics often testify that this tool is the handiest tool in their tool boxes. Brake Tube Pliers are lightweight, yet strong enough for any brake job.

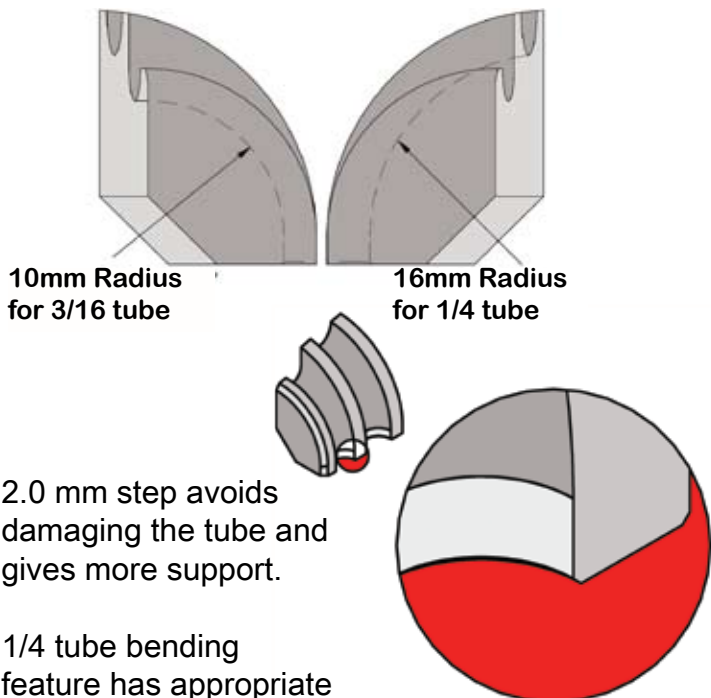

Brake Tube Pliers are designed to work efficiently, securely, and accurately in tight spaces, without damaging the brake tube.

Hardened for long life.

So, when the job calls for working with 3/16" or 1/4" brake tube, Brake Tube Pliers will make life as easy as 1, 2, 3.

### Distinguishing Features

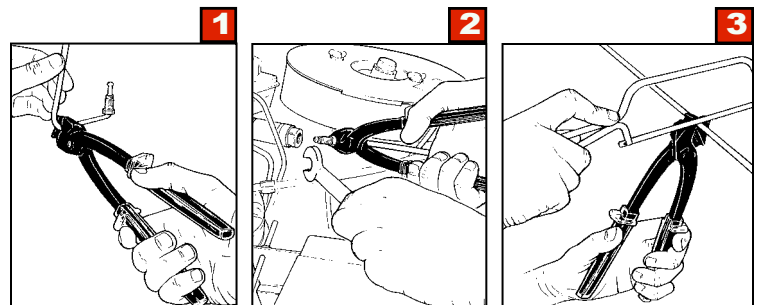

10mm Radius for 3/16 tube

16mm Radius for 1/4 tube

2.0 mm step avoids damaging the tube and gives more support.

1/4 tube bending feature has appropriate bend radius for a tight bend without kinking

1 Allows a tight 90 degree bend on the brake tube, right at the tube nut.

2 Allows you to align the tube end nut during assembly. In addition, it grips 3/16" or 1/4" brake tube securely without damaging it.

3 The hardened, square face on the back of the Brake Tube Pliers acts as a guide to cut 3/16" or 1/4" brake tube squarely.
