

Power Steering Hose Repair Service

BrakeQuip
INNOVATIVE SOLUTIONS FOR AUTOMOTIVE PLUMBING

Repair those failed power steering hoses instantly using the highest quality hose and unique fittings that allow the reusing of the existing fitting. This feature allows the flexibility to economically repair most power steering hoses.

Both high pressure and low pressure hoses available. This is important because if the high pressure hose has failed then the low pressure hose has also deteriorated and will need to be replaced at the same time.

Hose Information

High Pressure Hose

This hose has a high temperature rating and is compatible with all power steering oils. High expansion for noise resistance. Complies with SAE J2050 standard.

Temperature Range: -40°F to + 300°F
(-40°C to + 150°C)

Note: 

Restrictors are available if required.

Low Pressure Hose

This hose has a high temperature rating and is compatible with all power steering oils. It has a fabric cover to distinguish it and for flexibility. Complies with SAE J1019 standard.

Temperature Range: -40°F to + 300°F
(-40°C to + 150°C)
